PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building production web applications across AI/legal-tech, multi-tenant sports management, booking and operations systems, and API-driven business workflows. Strong across React.js, Next.js, Remix, TypeScript, Node.js, NestJS, Express.js, MySQL, PostgreSQL, and MongoDB, with hands-on experience in real-time Socket.IO communication, role-based access control, Stripe payments, AWS/S3 integrations, and responsive frontend engineering.

CORE TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Remix, Redux, Tailwind CSS, Material UI, Bootstrap 5, Styled Components, Responsive UI

Backend & APIs: Node.js, NestJS, Express.js, REST APIs, GraphQL, Socket.IO, WebSockets, API Integration, RBAC

Databases & Cloud: MySQL, PostgreSQL, MongoDB, AWS S3, Stripe

Engineering: Multi-Tenant Applications, Admin/Vendor Portals, Authentication & Authorization, Git, GitHub, Secure Deployment Workflows

PROFESSIONAL EXPERIENCE

Firefly Tech Solutions — Full Stack Developer

Jan 2024 – Present | Islamabad, Pakistan

- Develop and maintain full-stack web applications using React.js/TypeScript/Remix on the frontend and Node.js/NestJS/Express-based services and APIs on the backend, supporting legal-tech, operations, education, commerce, and management workflows.
- Build responsive admin dashboards and backend modules for inventory, employee records, attendance, product/catalog management, orders, customer interactions, and real-time application updates.
- Implemented payment-enabled e-commerce workflows with Stripe and database-backed business logic, including product management, order processing, and administrative controls.
- Collaborate across frontend and backend layers to design and integrate APIs, refine user flows, resolve application issues, and deliver maintainable production features across client-facing and administrative products.

Nexgen Solution — Software Engineer

Mar 2023 – Nov 2023 | Rahim Yar Khan, Pakistan

- Developed and optimized React.js UI components for responsive, data-driven web applications, improving interaction quality and overall usability across application screens.
- Worked with structured application data to improve accurate frontend presentation and smoother user workflows across dynamic interfaces.
- Supported an Amazon drop-shipping platform through product listing optimization, order fulfillment processes, and data-driven operational workflows.

SELECTED PROJECTS

Active Arenaz — Sports Venue Booking & Operations Platform

Full Stack Developer | React/TypeScript, Node.js, Socket.IO, AWS/S3

- Developed full-stack features for a multi-tenant sports management platform with separate Admin and Vendor portals, covering venue management, bookings, payouts, notifications, support tickets, and tenant-level operations.
- Built React/TypeScript interfaces and Node.js APIs for Admin/Super Admin permissions, role-based access control, vendor account suspension controls, and scalable platform administration workflows.
- Implemented live in-platform chat using Socket.IO and supported AWS/S3 integrations for secure media handling and production application workflows.

AI Attorney — AI-Powered Legal Services Platform

Full Stack Developer | Remix, Node.js

- Developed full-stack features for an AI-powered legal services platform, including the landing page, drafting screen, and legal library experience using Remix with responsive, reusable UI components.
- Built and integrated Node.js backend APIs and services to support application workflows and frontend-backend data exchange for legal drafting, library, and client-management experiences.
- Integrated frontend and backend functionality into maintainable end-to-end workflows, supporting consistent application behavior across legal-service features.

Metro Pakistan Assessment — Employee Performance Platform (React.js, Node.js, PostgreSQL)

- Built employee assessment workflows using React.js with Node.js and PostgreSQL backend services to support automated evaluations and structured reporting.
- Developed data-driven interfaces and backend integration flows for employee performance assessment and administrative review.

Event Vista — Event Management & Booking Platform

- Built an event-management platform with an administrative dashboard for event image uploads, event details, and scheduling.
- Enabled users to review real-time event availability, identify open slots, and complete online booking workflows.

Campus Pro — School Audit System

- Developed a system for a nonprofit organization to support structured school-audit workflows and administrative operations.

Office Management System

- Developed employee-management and attendance-tracking workflows for day-to-day office administration.

EDUCATION

Khwaja Fareed University of Engineering & Information Technology (KFUEIT)

Bachelor of Computer Science

2020 – 2024

Rahim Yar Khan, Pakistan

Punjab Danish Schools

Intermediate (ICS), Computer Science

2017 – 2019

Rahim Yar Khan, Pakistan

LANGUAGES

English, Urdu — Professional working proficiency
